Here, over the ground floor, which houses the private rooms, a suspended volume produces overhanging areas that shade and protect part of the courtyard and entrance. This cross-shaped overlap has been constructed according to the direction of the wind and sun.

Ici, le volume suspendu du rez-de-chaussée où se trouvent les pièces privées génère des zones en saillie qui apportent de l'ombre et protègent une partie de la cour et de l'entrée de la pluie. Lors de l'élaboration de cette superposition en croix, la direction du vent et du soleil a été prise en compte.

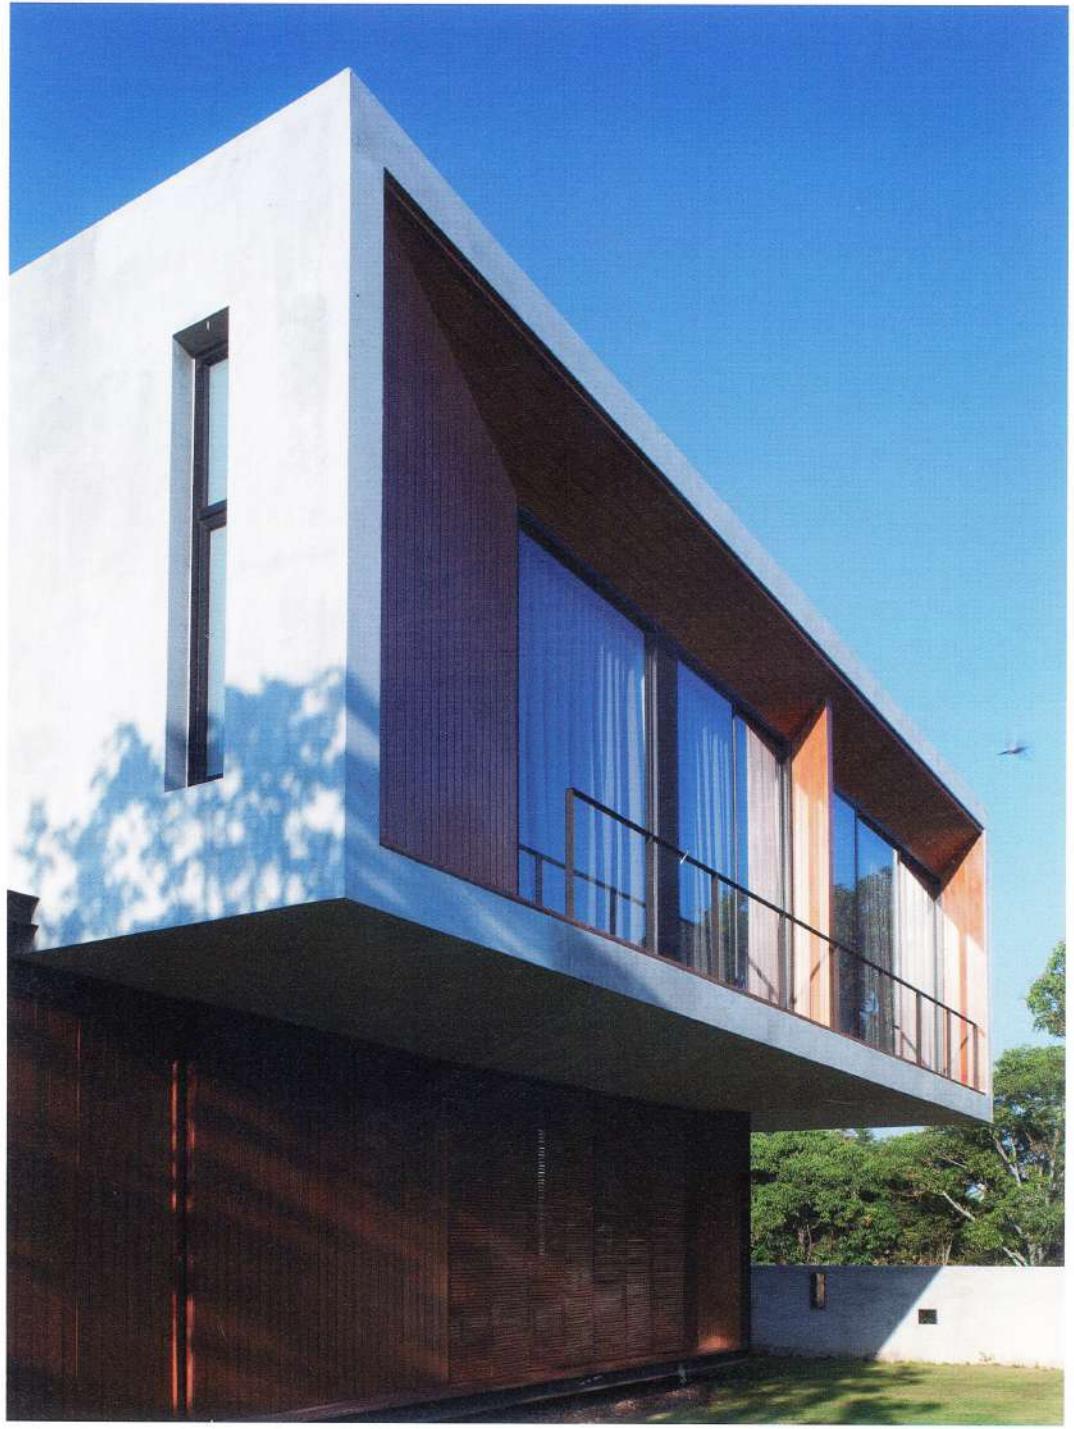

Hier entstehen durch den Baukörper, der sich über das Erdgeschoss erstreckt, in dem sich die Privaträume befinden, vorspringende Bereiche, die Schatten spenden und einen Teil des Innenhofs und den Eingang vor dem Regen schützen. Diese Kreuzüberlagerungen wurden durch die Übereinstimmung mit der Windrichtung und der Sonne erreicht.

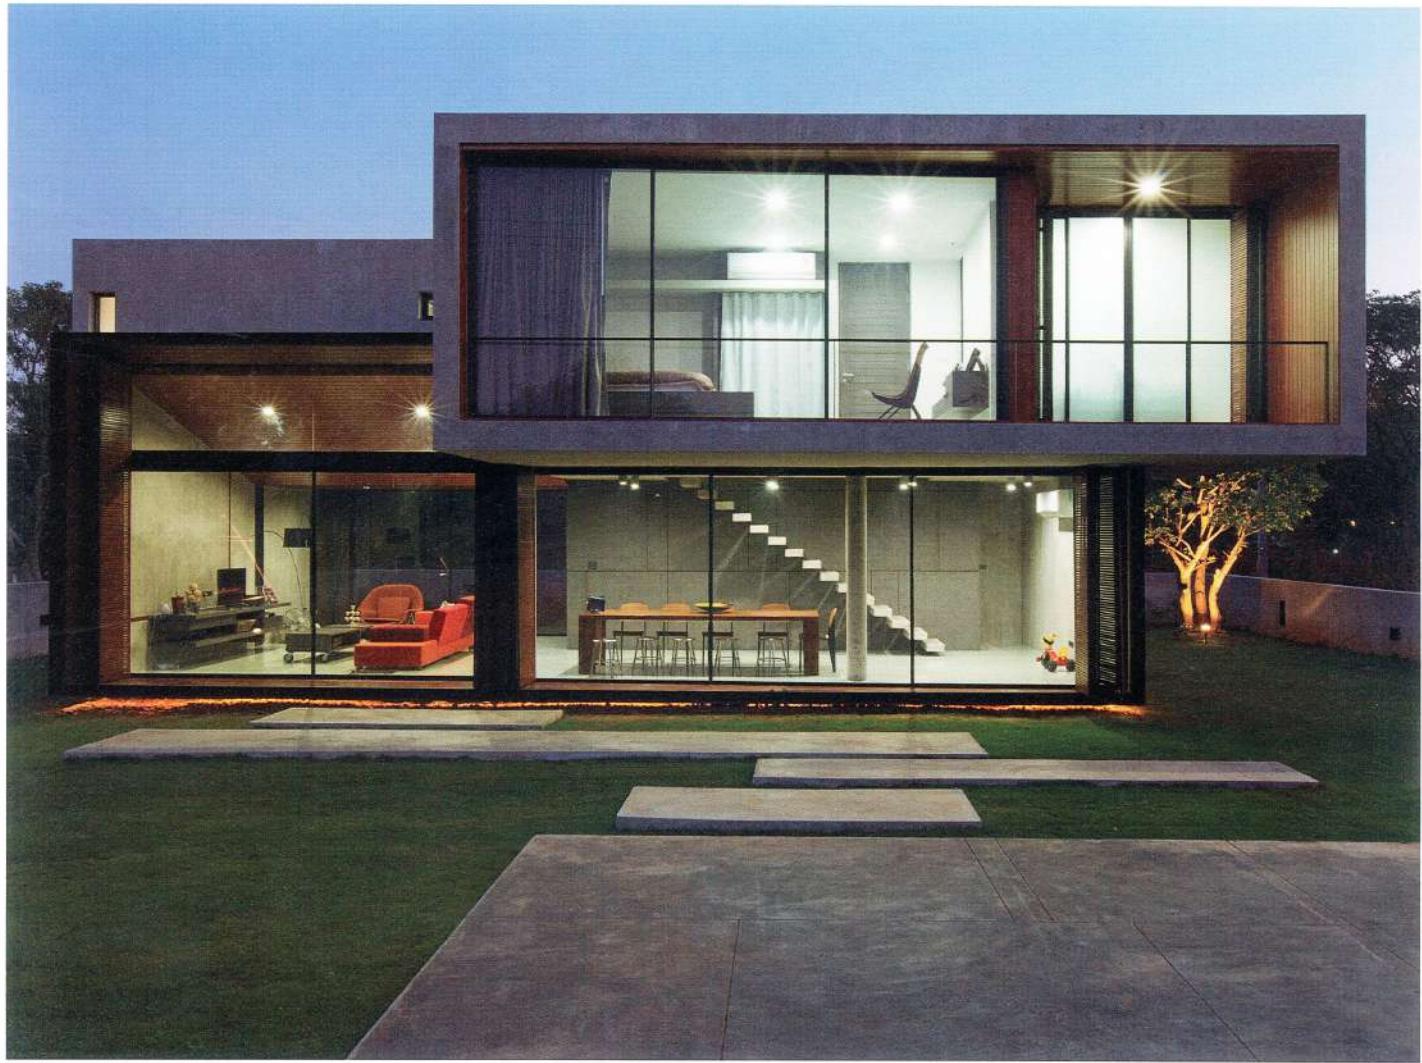

De ruimte die boven de begane grond hangt en waarin de privéverblijven liggen, creëert zwevende ruimtes die een deel van de tuin en de ingang schaduw geven, en beschutting tegen regen. Bij het ontwerp van de kruisvormige superpositie van dit huis is rekening gehouden met de vier windrichtingen

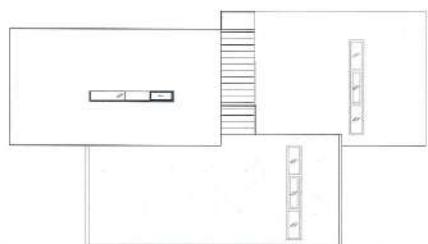

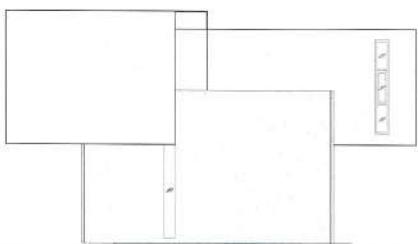

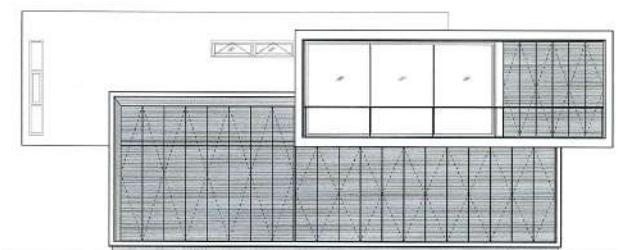

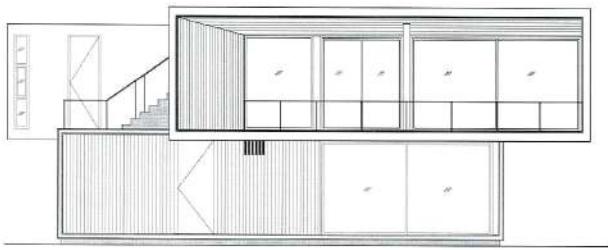

Aquí, el volumen suspendido sobre la planta baja, en donde se sitúan las habitaciones privadas, produce áreas voladizas que sombrean y protegen de la lluvia una parte del patio y de la entrada. Esta superposición en cruz se ha constituido de acuerdo con la dirección del viento y del sol.

In questo caso, il volume sospeso sul piano terra, dove sono sistemate le camere private, genera aree sporgenti che riparano dal sole e proteggono dalla pioggia una parte del cortile e dell'ingresso. Questa sovrapposizione a croce è stata realizzata secondo la direzione del vento e del sole.

Aqui, o volume suspenso sobre o andar de baixo, onde se situam as divisões privadas, gera áreas salientes que proporcionam sombra a uma parte do pátio e da entrada e os protegem da chuva. Esta sobreposição em cruz foi determinada em função da direção do vento e do sol.
